## 2018 Disease Rating\* Rhizoctonia

\* The disease ratings are general in nature and may not be representative of all fields in a township

Moderate Severe

## **Rhizoctonia** Management\*

| Disease Severity | Management Opportunities   |
|------------------|--|
| Severe           | <ul> <li>Plant varieties with a rating of less than 3.82, the lower the better</li> <li>Band apply full rate of fungicide once or twice starting 4-5 weeks after planting</li> <li>Use a Rhizoctonia fungicide seed treatment</li> <li>Use at-plant Azoxystrobin (AZteroid, if mixing with starter fertilizer)</li> <li>Use atop crop rotations</li> <li>Use good field drainage practices</li> <li>Previous crop in rotation should be small grains</li> <li>Plant early</li> <li>Control alternate weed hosts</li> <li>Consider tile drainage</li> <li>Rent disease-free land if possible</li> <li>Don't practice mechanical weed control</li> <li>Consider two small grain crops prior to sugarbeets</li> <li>Plant Rhizoctonia resistant soybeans if available</li> <li>Effectively control insects</li> <li>Control soybean cyst nematodes</li> </ul> |
| Moderate         | <ul> <li>Plant varieties with a rating of less than 4.4, the lower the better</li> <li>Band apply full rate of fungicide 4-5 weeks after planting</li> <li>Use a Rhizoctonia fungicide seed treatment</li> <li>Consider using at-plant Azoxystrobin (AZteroid, if mixing with starter fertilizer)</li> <li>Use long crop rotations</li> <li>Use good field drainage practices</li> <li>Previous crop in rotation should be small grains</li> <li>Plant early</li> <li>Control alternate weed hosts</li> <li>Don't practice mechanical weed control</li> <li>Effectively control insects</li> <li>Control soybean cyst nematodes</li> </ul>   |
| Slight           | <ul> <li>Plant high yielding resistant varieties with a rating of less than 5.00</li> <li>Band apply full rate of fungicide 4-5 weeks after planting</li> <li>Use a Rhizoctonia fungicide seed treatment</li> <li>Use long crop rotations</li> <li>Use good field drainage practices</li> <li>Plant early</li> <li>Control alternate weed hosts</li> <li>Don't practice mechanical weed control</li> <li>Effectively control insects</li> <li>Control soybean cyst nematodes in rotation</li> </ul>  |
| •                | <ul> <li>Prevent introduction of disease, use long crop rotations</li> <li>Control weeds effectively</li> <li>gies listed in priority order</li> </ul>   |

\*\* Consider use of American Crystal Sugar Company Agronomy App to aid in Rhizoctonia management January, 2019
