

2022 Seed Product Guide

Amalgamated Sugar Company Varieties

2022 Seedex Amalgamated Sugar Varieties

SX 1578N

NEMATODE

- Excellent Well-Balanced Variety
- Excellent Yield and Sugar Content
- Higher Yields at 53.65 Ton/Acre
- Excellent Disease Package
- Excellent Root Aphid, Powdery Mildew and Aphid Tolerance
- Excellent Nematode Tolerance
- Excellent RZM Tolerance with Tandem Genetics
- Moderate Cercospora Tolerance

SX 3584

NON-NEMATODE

- 105% ers/t + 108% ers/ac = 213% total ers
- Excellent sugar content at 17.96%
- High ERS/ton at 310 lbs/t
- Excellent Non Nematode Genetics
- Excellent RZM tolerance with Tandem genetics
- Excellent Powdery Mildew, Root Aphid, and Aphanomyces tolerance
- Moderate Cercospora Tolerance

SX 3592N

NEMATODE

- 105% ERS/Ton + 107% ERS/Acre = 212% Total ERS
- Excellent Sugar Content at 17.69%
- Well-Balanced Variety Between Sugar Content and Yield
- Excellent Powdery Mildew Tolerance
- # 1 Ranked Variety in the Powdery Mildew Tolerance Trial
- High Aphanomyces and Rhizomania Tolerance
- Excellent Root Aphid Control
- Excellent Nematode Control

SX 3593N

NEMATODE

- 105% ERS/Ton + 108% ERS/Acre = 213% Total ERS
- Excellent Sugar Content at 17.65%
- Excellent Yield at 52.26 ERS/Acre
- Excellent Disease Package
- High Aphanomyces and Powdery Mildew Tolerance
- Excellent Root Aphid Control
- Excellent Rhizomania Tolerance with Tandem Genetics

2022 Seedex Amalgamated Sugar Treatments

SeedGuard

SG F-I

FUNGICIDE, INSECTIDE, AND APH TREATMENTS

Nipsit Inside

- Protection against sugar beet root maggot, wireworms, white grub, and leafhopper.

Apron & Maxim (Fungicides)

- For Pythium & Damping off

Zeltera

- for added early season Rhizoc, Fusarium, & Damping off control

XBeet (Priming)

- For faster and more consistent stands

Add On

- Tachigaren 20g
- Tachigaren 20g can be added to this package for early season Aphanomyces control

SeedGuard

INSECTICIDE (SG I)

FUNGICIDE AND APH TREATMENTS

Nipsit Inside

SEED & PACKAGING SIZES

Mini Pellet (MP)	8-10/64	6 units/pail
Reg Pellet (RP)	9.5-11.5/64	4 units/pail
Large Pellet (LP)	10.5-13.5/64	3 units/pail

SEDEX VARIETY TECH SHEET

	SX1578N	SX3584	3592N	3593N
% ers/ton	105	105	105	105
% ers/ac	111	108	107	108
TOTALS	216	213	212	213
% sugar	17.49	17.96	17.85	17.84
tons/acre	53.1	51.02	51.33	52.13
ers/acre	16027.6	15872.5	15924.6	16063.8

Seed size is not guaranteed – ISR may have to substitute sizes. Seed is sold by the unit and only in full pail quantities. Opened, partial, or damaged pails cannot be returned. Seedex highly recommends that growers test and determine plantability of each seed size for their planter.

Growing Partnerships

Seedex, Inc. is a sugarbeet seed company that breeds plant varieties and produces high quality seeds suitable for the various sugarbeet growing regions of the U.S. and Canada.

Seedex is dedicated to research, and has a long tradition of producing sugarbeet seeds containing superior genetics with fast emergence, strong vigor, outstanding purity, industry-leading sugar, and balanced disease tolerance. In addition, the customer service our grower-dealer network provides is well known in the industry.

Seedex, Inc. was formed in 1987 in Longmont, CO, and is a member of West Coast Beet Seed Company (WCBSC), a non-profit owned by the majority of the world's beet seed companies. WCBSC produces our seed and for all of their owner companies.

Seedex, Inc.'s U.S. Headquarters is located in Fargo, North Dakota, in the middle of the abundant Red River Valley sugarbeet growing region, and is owned by the Florimond DesPrez Group, an independent, family-owned French company that is a world leader in the sugarbeet breeding and seed industry.
